

Responsible Purchasing Policy

NUMERYX GROUP

NUMERYX

RESPONSIBLE PURCHASING POLICY

Numeryx Technologies recognises the importance of integrating environmental criteria into our purchasing processes. We are committed to promoting responsible purchasing practices aimed at reducing our environmental footprint.

Here are the key principles, commitments and objectives of our Responsible Purchasing Policy:

Responsible supplier selection:

We favour suppliers that share our environmental values and integrate sustainable practices into their operations. We assess their sustainability performance, their compliance with environmental regulations and their commitment to corporate social responsibility (CSR).

Circular economy and electronic waste management:

We encourage the circular economy by promoting the tracking, maintenance and repair of our electronic products, and by encouraging the purchase of recycled, refurbished or energy-saving electronic products. We also seek to minimise electronic waste by facilitating its recycling and appropriate reuse.

Energy efficiency:

We also encourage the use of virtualisation and energy management technologies to optimise our carbon footprint.

Suppliers' environmental responsibility:

We ask our suppliers to comply with environmental standards for the manufacturing, packaging and management of products

Awareness and training:

We invest in raising our employees' awareness of environmental issues related to purchasing. We provide regular training on responsible purchasing practices, waste management and the adoption of environmentally friendly behaviour.

This policy reflects our ongoing commitment to responsible purchasing and our contribution to preserving the environment.
